

OUR SERVICES

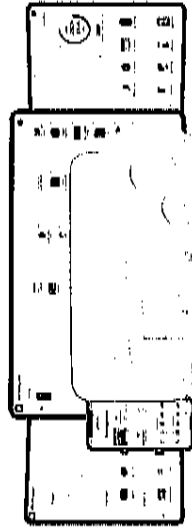

WIFI ANALYSIS

Businesses commonly experience wifi signal deterioration and spotty coverage due to channel crowding and physical signal barriers. JQ techs can quickly analyze these deficiencies and provide a roadmap to optimum coverage wirelessly using Ubiquiti UniFi technology.

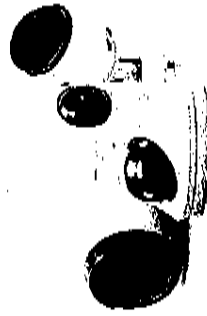

UBIQUITI WIFI

JQ uses Ubiquiti state-of-the-art UniFi technology to solve wifi coverage and reliability problems by building a true wifi network tailored to your heat map.

UBIQUITI PROTECT

JQ now offers high resolution video surveillance to its customers. Ubiquiti cameras are integrated seamlessly with UniFi to provide high resolution, night vision and smart detection using AI.

WHO WE ARE

JQ has provided future ready office solutions, equipment and support to midwest businesses for more then 50 years. We are pleased to introduce supporting infrastructure services and equipment to our customers including wifi optimization and security surveillance beginning December, 2023.
